

I respectfully request that the Commission reject the petition filed by the NAB under number 04-160. I have been a subscriber to XM radio for the past two and one half years. During that time, I have enjoyed the ability to select what I listen to in regards to their programming and now have the ability to have immediate, up to date traffic and weather in my area. This service is NOT available to me over the normal airwaves. I must listen to programming I have not the least bit of interest in until they decide to update the traffic and weather, including commercials which I don't want. Please continue to allow ME, the consumer, the ability to select a channel for my update, when I need it, and not when someone else decides I can have it! Thank you for your consideration.
